

Bryce Berczik

(512)-571-4420 | bryceberczik.dev@gmail.com | Marble Falls, TX

Summary

Full-stack developer with expertise in React, TypeScript, JavaScript, and Python. Experienced in PostgreSQL, MongoDB, GraphQL, and API development (REST & GraphQL). Passionate about creating user-friendly front-end designs and solving backend challenges to build scalable applications. Skilled in problem-solving, agile workflows, and delivering efficient software solutions. Always evolving with modern technologies.

Experience

Personal Shopper | 04/2024 - 06/2024 | Walmart | Marble Falls, TX

Worked as a Personal Shopper at Walmart, selecting and preparing online orders for customers, ensuring accuracy, efficiency, and a positive shopping experience.

Warehouse Associate | 10/2023 - 04/2024 | Best Buy | Austin, TX

Worked as a warehouse associate at Best Buy, managing inventory, processing shipments, and ensuring efficient stocking and organization of products.

Personal Shopper | 08/2022 - 10/2023 | HEB | Austin, TX

Shopped and prepared curbside pickup orders across all departments for customers.

Skills

Typescript, Time management, React.js, Tailwind, PostgreSQL, MongoDB, Prisma, RESTful API, Express, MERN, Artificial Intelligence, Problem Resolution, Amazon Web Services, Deployment, Testing, CI/CD

Education

Web Development | University of San Antonio | 11/2024 | Remote

Completed a full-stack bootcamp with hands-on experience in React, PostgreSQL, MongoDB, and GraphQL. Developed APIs and built dynamic web apps, focusing on front-end and back-end integration.

Projects

Stellabyte – A cloud storage platform built on Amazon S3 and Prisma ORM, offering scalable storage with a cosmic-themed UI for an immersive file management experience.

Digbi AI – A text-to-video chatbot powered by OpenAI and D-ID, transforming user prompts into dynamic AI-generated videos.

Pronx – A productivity app that helps users stay organized with task management, Kanban boards, and event scheduling.

codeBounty – A platform connecting developers, designers, and analysts with clients, offering services from database creation to app development and design.
